

TIPPMANN ORDNANCE CO

REALITY BASED TRAINING DEVICES

The SSB-24A Suicide Bomber Vest is a training aid device that is used to simulate the fragmentation effects caused by a personnel-type suicide attach device. It is a micro-pneumatic command detonated system that's deployed as a vest and worn by the attacker.

The SSB-24A vest is designed to be worn underneath a concealment garment that can be altered or changed to fit the operational requirements of the exercise and also eliminate the "brown coat" syndrome.

SSB-24A SUICIDE BOMBER VEST

Model SSB-24A SUICIDE VEST	
Exterior Dimensions	96mm W x 422.7mm H
Net Weight	20 lbs.
Shipping Weight	30 lbs.

Max PSI	100 PSI
Effective Firing Range	30 yds
Load	Refillable Liquid Paint Charge
Ammunition	16 oz Paint
Charge	CO2
Safety Pop Off	125 PSI

Options/Accessories	
Paint recharge
